<b>30.9%</b>	<b>18.7%</b>	<b>3%</b>	<b>14.2%</b>	<b>3.0%</b>	<b>8.1%</b>	<b>2.8%</b>	<b>5.1%</b>	<b>14.2%</b>

\*Based on UDSMR 2013 annual reporting which includes 664 patients

In order to measure a person's progress during rehabilitation, it is necessary to use a standard rating scale. The scale most frequently used is the **FIM™** (Functional Independence Measure) The patient's levels of independence in (18) areas are measured and that total is part of the outcomes measurement.

**To make a referral, please call our admissions department:  
772-467-3577**
